

Jacek Jarczok

Senior UI Designer

Poland • jacek.jarczok@gmail.com • +48 793 321 044 • Portfolio: www.jarczok.com

Profile

UI-focused Designer with strong experience in **greenfield products and MVPs** as well as complex web platforms. I design scalable interfaces and **design systems** for startups and enterprise clients, often working as a sole designer closely with developers and stakeholders. I also contribute to UI implementation, ensuring strong design-to-code consistency.

Experience

UX/UI Designer & UI Developer — EUVIC

Dec 2022 – Present

- Designed and shipped web and mobile applications for enterprise and startup clients
- Led UI design for **greenfield products and MVPs** from concept to launch
- Created and maintained **scalable design systems** (components, documentation)
- Worked as **sole designer** on platforms in manufacturing, logistics and IoT domains
- Collaborated closely with designers, developers, product owners and business stakeholders
- Contributed to **frontend UI implementation** (Vue.js, CSS)

UX/UI Designer & UI Developer — EUVIC – ADEN PLUS

Mar 2021 – Nov 2022

- Designed web applications and landing pages
- Developed UX/UI concepts for new features and products
- Built and maintained **component libraries and design systems**
- Supported development with UI-focused frontend work

Web Designer & Developer — Freelance

2018 – 2021

- Designed and developed websites for small and medium-sized businesses
- Delivered **end-to-end solutions**: design → implementation

Photographer

2010 – 2018

Selected Projects

Budmat — Enterprise web platform

- Full digitalization of a manufacturing company: production, logistics, orders, complaints
- **Greenfield product** built from scratch
- **Role: Sole designer**, UI design, design system, UI development support

ADB Safegate — Enterprise airport operations platform

- Design of an additional module for an existing suite used to manage airports and airside operations
- High-reliability, complex enterprise environment
- **Role: Sole designer**, UI design within existing design constraints

OVPS — Logistics & route planning platform (startup)

- Platform for truck route planning and parking space reservations
- **Greenfield startup product**
- **Role: Sole designer**, UI design, MVP scope definition, frontend support

Petomix — Application for a cooking device (startup)

- Web and mobile app
- **Role: Mobile UI Designer** (Android, iOS), collaboration in a team of 4 designers
